Working Experience

2014 ***Amaventi Finance interim & accountancy services***
In January 2014 I have started my own business under the name Amaventi Finance as freelance financial consultant. After 10 years of working experience at a Big 4 audit firm, I have set my goals to extend my skills as professional in areas other than financial audits. I want to achieve this to offer my services to external companies at temporary positions. Job descriptions are: (assistant) controller, support during financial projects, internal audits, transitions in financial reporting standards, improvements in management information, improvements in internal control environments or as temporary support in the flexible workforce of an audit firm. I have built my expertise in a wide ranged portfolio (size and nature of business of clients) and therefore I am capable of meeting many requirements. My ultimate goal is to achieve a position of Chief Financial Officer.

Quality, endurance, ambition, social skills, and passion for the profession are the characteristics that describe me as a person and as a professional. These characteristics I have combined in the name of my company Amaventi, a combination of **Am**andi (Latin for to love) en **Vent**ilabi (Latin for endurance, determination).
